Project: Build a Solar System

Using any materials you like, it'd be great to create your own solar system mobile.

Use whatever tools and techniques you like, and if you can get pictures of the process, that'd be fantastic!

Use the internet to research and inspire you. You could even write a short paragraph explaining why you chose these materials and how they show the different elements that planets are made from.

Happy building everyone!

Dormanstown Primary Academy

Home Learning –Spring 2020

During this term, 5S are studying the topic of 'Space'. As the children will be continuing this theme throughout the Spring Term, I have listed a number of activities which can be completed at home in order to engage your child even further.

This home learning is for the next 6 weeks. This is not compulsory but children are encouraged to complete the tasks (perhaps on a weekly basis) and bring the project back to school on the specified date.

The 'Project' is an opportunity for children to complete with help from their family and friends and build on work done in class this week.

Reading is an essential part of your child's development; please visit the local library so that your child is able to choose books which particularly interest them. Alternatively, encourage them to read texts other than books, such as subtitles on their favourite film or instructions for games (like a Minecraft walk-through). More ideas are in their Home reading Journal.

| Activity | |
|---------------|--|
| Week 1 | Create a painting of the Space |
| Week 2 | Use different objects to throw into sand to make a moon surface |
| Week 3 | Design and make a new planet |
| Week 4 | Design a space suit |
| Week 5 | Find out about famous astronauts and create a fact-file about them. |
| Week 6 | Imagine you met an alien, what would be the first 5 things you'd show and tell them? Why? Present this however you like. |

Thank you for your continued support.

Mr Stammers and Miss Anderson
